PROJECTS

TENTS : EVENT TABULATION SYSTEM

https://tentstabulation.com/

- Developed a comprehensive event tabulation system widely that was used in various school events.
- Took a lead role in front-end web development, including designing the index page and other critical components.
- Collaborated closely with the backend to ensure seamless integration
- Contributed to the creation of dynamic and visually appealing charts and graphs for data visualization.

CORAL : ECCOMERCE WEBSITE

https://coral-eccomerce-client.vercel.app/

- Spearheaded the development of a stunning and responsive UI for the eCommerce app using Tailwind CSS.
- Implemented a robust checkout system powered by Stripe for secure and efficient payment processing.
- Leveraged Zustand for streamlined state management, enhancing the app's performance and maintainability.

TASTE QUEST

https://taste-quest-olive.vercel.app/

- Designed a visually appealing and intuitive user interface using Figma.
- Developed the website, integrating Spoonacular API for diverse recipe content.
- Ensured a delightful user experience through responsive design and effective navigation.
